

6" COLONIAL WALL

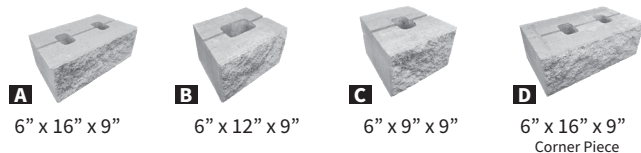

Chesapeake Blend

Graphite Pearl Blend

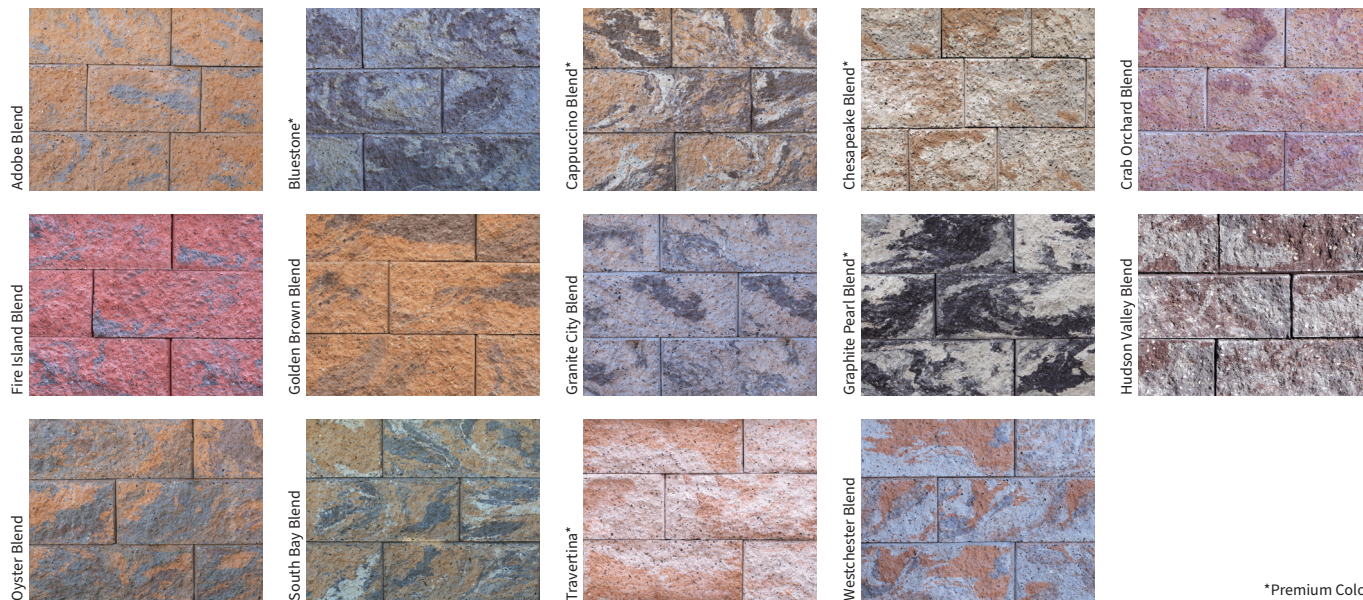

The Colonial Wall System features a distinctive double-sided face, hard-split finish. You can build the 3" or 6" wall individually or combine them for added dimension. There is also a prepackaged Colonial Pier to add the finishing touch to your wall.

4-Piece

35 Sq Ft on Pallet
 75 Pcs on Pallet | A-15 B-25 C-25 D-10
 Pallet Weight: 3,200 lbs (Hollow Core)
 Pallet Weight: 4,075 lbs (Solid Core)

*Premium Color

South Bay Blend

Corner blocks are used to build the pier. A cap provides the finishing touch as well as additional lighting possibilities.

6" Corner

Builds Per Pallet:

One: 20" x 20" x 72" H pier

Two: 20" x 20" x 36" H piers

6" x 8" x 12"

24 Sq Ft on Pallet
 48 Pcs on Pallet
 Pallet Weight: 2,164 lbs

Maximum exposed height for gravity walls is 36" under ideal conditions. Soil type, crest slopes and surcharges will decrease max exposed height for gravity walls. Consult a professional engineer to determine site and specific colors.

NOTE: All walls over 2' in height or as required by local code should be designed by a licensed professional engineer. All measurements are nominal. Variance in square footage or linear footage coverage can be up to 5% depending on joint width. The possible occurrence of efflorescence does not affect the structural integrity of the product. Efflorescence is a normal occurrence in concrete products and will dissipate with normal weathering. The use of concrete as a base or setting bed may increase the possibility of efflorescence.
