Maximum exposed height for gravity walls is 36" under ideal conditions. Soil type, crest slopes and surcharges will decrease max exposed height for gravity walls. Consult a professional engineer to determine site and specific colors.

**NOTE:** All walls over 2' in height or as required by local code should be designed by a licensed professional engineer. All measurements are nominal. Variance in square footage or linear footage coverage can be up to 5% depending on joint width. The possible occurrence of efflorescence does not affect the structural integrity of the product. Efflorescence is a normal occurrence in concrete products and will dissipate with normal weathering. The use of concrete as a base or setting bed may increase the possibility of efflorescence.
